Ryan notified the committee that the Palmer Historical Society would like to come to a meeting to inform us about a survey they are taking.

The committee reviewed some of our top priorities including looking at water and fire districts. One of the major components of the master plan is the merger of these districts. Ryan went over the process of how that would need to happen,

The committee also discussed the Forest Lake project including the new pipeline to Camp Ramah and how that would serve the master plan.

Amber agreed to pull out the necessary goals from the master plan that applied to the historical society.

Ryan admonished the use of social media posts by committee members.
